

aero_rep_get_aero_conc_type

```
graph LR; A[aero_rep_get_aero_conc_type] --> B[aero_rep_modal_binned_mass_get_aero_conc_type]; A --> C[aero_rep_single_particle_get_aero_conc_type];
```

The diagram illustrates a hierarchical structure. A central node, 'aero_rep_get_aero_conc_type', is shown in a grey box. Two blue arrows originate from its right side, pointing to two separate white boxes. The top white box contains the text 'aero_rep_modal_binned' followed by '_mass_get_aero_conc_type' on a new line. The bottom white box contains the text 'aero_rep_single_particle' followed by '_get_aero_conc_type' on a new line.

aero_rep_modal_binned
_mass_get_aero_conc_type

aero_rep_single_particle
